

SAFETY PROGRAM

BUILDING A SAFE WORKPLACE

It is our policy and philosophy to provide a safe, zero-accident, and healthy work environment for all students and employees. To meet these expectations, we are offering an updated Safety Program which has been developed to assure compliance with OSHA regulations.

Participants

All adults interested in maintaining a safe and zero-accident work environment. Participants will achieve Osha 10 certification.

Program Dates

10 hours long course that will be running all during the year:

- March from 14th to 16th, 2023
- October from 24th to 26th

Program Overview

Working at construction and in Job Sites could be dangerous. Most of the Job-Site accidents are caused by failure at recognizing hazards, lack of knowledge and training, poor planning or having a risk behavior. To help to prevent hazards and to achieve the main goal of the company that is zero-accident and safe work environment, we are offering a Safety Program. We consider that Safety must be incorporated in all the phases of a job, this involves students and employees at every level.

Why?

We consider that safety must be incorporated in all the phases of a job, this involves students and employees at every level.

Expected Outcomes

Students that finish our Safety Program will understand the benefits of safety, the cost of hazards in the workplace, and ways to reduce and prevent accidents.
